

Cyber Awareness Month Briefings

Upskill your staff with an intelligence-led cyber briefing and unpack what every employee needs to know.

The 2026 Cyber Awareness Month briefing combines essential security and scam awareness with an investigative look at emerging cyber threats and how they affect your people.

Designed for audiences at all levels of cyber literacy, the session translates emerging threats into practical behaviours staff can apply in their day-to-day work.

The session explores how developments in AI, insider threats and social engineering are changing the way threat actors target organisations and their people.

Participants will learn how these threats may present, what should raise suspicion and how individual actions can help reduce organisational risk.

This interactive session will unpack:

- ▶ AI and emerging cyber threat considerations
- ▶ Insider threats and malicious insiders
- ▶ Evolving social engineering, including vishing and non-traditional approaches
- ▶ How cyber intelligence reveals threat actor intent, behaviours and tactics
- ▶ How staff can recognise, respond to and report suspicious activity
- ▶ Practical actions that strengthen organisational resilience

Leah Pinto

Director, Cyber Intelligence

Real threats. Frontline practitioners. Practical actions your people can take.

A Cyber Awareness Month briefing helps your people recognise today's cyber threats, make more secure decisions and reduce risk across your organisation.

Who this is for:

- ▶ Boards and executive leadership teams
- ▶ Security, risk and technology teams
- ▶ People, culture and HR teams
- ▶ Corporate and operational staff
- ▶ Customer-facing and high-risk teams
- ▶ Organisations looking to strengthen cyber awareness beyond compliance training.

Our speakers are cyber security practitioners working at the frontline of Australia and New Zealand's evolving threat environment.

They bring each session to life through real-world incidents, threat intelligence, practitioner insights and stories that make cyber risk relevant to your people.

Intelligence-led cyber awareness, grounded in the threats your people are facing now.

Investment

- ▶ In-person presentation from \$10,000
- ▶ Virtual presentation from \$7,000
