

Cyber Escape Rooms turn awareness into action

Immerse your teams in engaging and entertaining cyber awareness training in a live, gamified cyber experience that puts your teams in the centre of scenario led situations.

These interactive, story-driven sessions immerse participants in realistic scenarios that teach practical lessons through problem-solving and decision-making. Sessions are led by CyberCX's Cyber Capability, Education & Training (CCET) specialists, drawing on the experience of front-line practitioners.

When the pressure's on, will the right security decision be made? ”

Escape room scenarios

How to Hack: Think Like an Attacker

Step into the mind of a cyber criminal and see how easily an organisation can be breached by manipulating its people. Discover how attackers gather, exploit and weaponise information found online – and how small changes in behaviour close the gaps.

Everyday Actions: Building Personal Cyber Resilience

Cyber security isn't just an 'at the office' idea – it's a daily habit. Uncover the hidden risks in everyday actions, and see how small, smart choices build personal resilience and help protect the organisation.

AI & You: Navigating the Risks of a Digital Future

Artificial intelligence is already shaping how we work and live – but opportunity comes with risk. Explore how AI harvests personal data and how deepfakes can be weaponised, and leave with practical guidelines to use it safely.

Our approach

Interactive format

Group sessions where participants make security choices and see the impact of their decisions. Teams can be scored on a leaderboard for added engagement.

Session structure

Each session runs 60 minutes – a 5-minute introduction, 45-minute activity and 10-minute tailored security messaging – for groups of 10–12 participants.

Flexible delivery

Delivered on-premise or remotely; in-person encourages the strongest teamwork. Up to five sessions can run in a single day with one CyberCX facilitator.

Why CyberCX?

With the largest dedicated cyber security team in Australia and New Zealand, CyberCX brings together expert educators who know how to engage and inspire behavioural change, insights from frontline practitioners that bring real-world relevance to every session, and a deep understanding of the local threat landscape, regulatory context and cultural nuance. The result is a training experience that is both engaging and effective – strengthening one of your most important cyber defences: your people.

Organisational benefits:

Raise threat awareness

Increase employee awareness of real-world cyber threats through immersive, memorable learning.

Reduce people-based risk

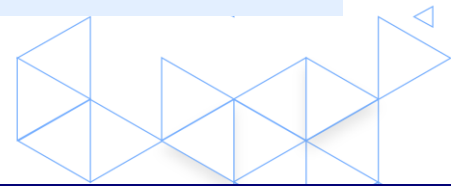

Lower the risk of people-based attacks such as phishing, social engineering and fraud.

Build a security culture

Embed security into everyday culture and meet compliance and regulatory training requirements with more meaningful engagement.

Decide well under pressure

Give your people the confidence to make better security decisions when it matters most.

About CyberCX

CyberCX unites our country's most trusted experts in delivering an unparalleled, comprehensive end-to-end portfolio of cyber security and cloud services across Australia and New Zealand.
